

Your Batteries Need EXTRA CARE

Batteries of any size or form, MUST NOT be placed in your household recycling or garbage bins – as they are a FIRE AND ENVIRONMENTAL HAZARD.

More than 450 fires in Australia have been linked to lithium-ion batteries over the past 18 months!

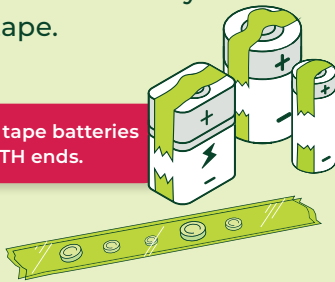

Batteries need extra care, and safe recycling involves a little first-aid and taping up your batteries.

These steps will help you SAFELY RECYCLE YOUR BATTERIES:

1 TAPE the terminals of used batteries to prevent sparking. Always use clear sticky tape.

Safely tape batteries on BOTH ends.

2 STORE used batteries in a clearly labelled glass or fire-resistant container for no longer than six months. Make sure the container is not airtight as pressure can build up.

Keep this container in a cool, dry place, away from heat sources like stoves and out of reach of children and pets.

3 DROP OFF batteries at a Battery Recycling Location near you.

LISMORE CITY Battery Recycling Locations

B-CYCLE BATTERY DROP OFF:

ALDI LISMORE
